

BB Glow Cleaning Protocol - Salon-Based Business

Maintaining a clean and sterile environment is crucial when performing BB Glow treatments to ensure client safety, prevent cross-contamination, and comply with health regulations. Follow this detailed cleaning protocol to uphold the highest hygiene standards in your salon.

Pre-Treatment Cleaning Procedures

1. **Hand Hygiene:** Wash hands thoroughly with antibacterial soap and warm water for at least 20 seconds. Use hand sanitiser before wearing gloves.
2. **Surface Disinfection:** Wipe down all treatment surfaces, including the treatment bed, trolley, and countertops, with a hospital-grade disinfectant.
3. **Sterilisation of Tools:**
 - Use disposable microneedling cartridges for each client.
 - If using reusable tools, sterilise them in an autoclave after each use.
 - Ensure dermapen and other non-disposable tools are disinfected using a high-level disinfectant.
4. **Towels and Linens:** Use freshly laundered towels and linens for each client. Disposable bed covers and headbands are recommended for added hygiene.
5. **Product Containers:** Wipe down all product bottles and containers with a disinfectant wipe before and after treatment.
6. **Personal Protective Equipment (PPE):**
 - Wear a clean disposable face mask and gloves before beginning the treatment.

During Treatment Cleaning Procedures

1. **Glove Changes:** Change gloves between different steps of the treatment, such as between cleansing and microneedling if necessary to avoid cross-contamination.
2. **Ampoules:** Wrap BB Glow ampoules with glad wrap to avoid cross-contamination.
3. **Surface Maintenance:** Immediately clean any spills with a disinfectant wipe to prevent contamination.

Post-Treatment Cleaning Procedures

1. **Dispose of Used Materials:**
 - Discard used microneedling cartridges, disposable gloves, and applicators in a biohazard sharps container.
 - Dispose of single-use bed covers and headbands properly.
2. **Disinfect Equipment and Surfaces:**
 - Wipe down all work areas, light switches, doorknobs, and high-touch surfaces with a hospital-grade disinfectant.
 - Clean and sterilise reusable tools using an autoclave or appropriate sterilisation method.
3. **Launder Towels and Linens:** Wash all towels and linens in hot water with disinfectant detergent after each use.
4. **Air Purification:** Ensure proper ventilation in the treatment room. Consider using an air purifier to reduce airborne contaminants.

5. **Personal Hygiene:** Remove gloves and wash hands thoroughly with antibacterial soap after completing the treatment and cleanup.

Daily Cleaning and Maintenance

- Sweep and mop floors with a disinfectant solution.
- Sanitise reception and waiting areas, including chairs, desks, and payment terminals.
- Empty trash bins regularly and replace liners.
- Clean and disinfect sinks, mirrors, and restroom areas.

BB Glow Treatment Cleaning Checklist

Pre-Treatment:

- ✓ Wash hands with antibacterial soap and sanitise before wearing gloves
- ✓ Disinfect treatment surfaces (bed, trolley, countertops)
- ✓ Ensure all tools are sterilised or disposable
- ✓ Use fresh towels, linens, and disposable bed covers
- ✓ Wipe down product containers
- ✓ Wear PPE (face mask, gloves, disposable apron if necessary)

During Treatment:

- ✓ Change gloves as needed
- ✓ Cover and protect BB Glow ampoules with glad wrap
- ✓ Wipe down spills immediately

Post-Treatment:

- ✓ Dispose of used needle cartridges, gloves, and other single-use items in a biohazard container
- ✓ Disinfect all surfaces and high-touch areas
- ✓ Sterilise reusable tools
- ✓ Wash and disinfect towels and linens
- ✓ Ensure proper ventilation and air purification
- ✓ Wash hands thoroughly

Daily Maintenance:

- ✓ Sweep and mop floors with disinfectant
- ✓ Sanitise reception area and common surfaces
- ✓ Empty trash bins and replace liners
- ✓ Clean and disinfect restroom areas
